DevOps Classroomnotes 13/May/2023

Troubleshooting Beats

- all the elastic componets logs can be viewed using `journalctl journalctl -u heartbeat-elastic.service`
- look into yaml for syntax issues and cloud id and auth for configuration
- ensure metrics are enabled

Metric Beat

- This beat collects metrics about system and some predefined applications
- Install metric beat [Refer Here](#)
- We will get system and nginx metrics to elastic cloud in next session
